Residential development site plots at Flawcraig Farm, Rait, Perthshire

A90 Inchmichael Junction 1 mile, Glencarse 2 miles, Perth 7 miles, Dundee 11 miles
Stirling 45 miles, Edinburgh 52 miles, Glasgow 70 miles

Residential development opportunity of 3.1 acres with full planning permission for 11 house plots. See Perth & Kinross Council planning ref: 14/01525/FLL

The site benefits from a south facing, sheltered and quiet location, close to the idyllic villages of Kinnaird (Inchture) and Rait. Whilst being a tranquil rural setting the site is still very much within easy commuting distance of Perth and Dundee. With an elevated position allowing views down the Carse of Gowrie and over the River Tay to the Lomond Hills in Fife. There have also been a number of other very successful developments carried out nearby, including ones at Charleston and Abernyte.

Fixed Price £550,000 as a whole for a developer to service and build out

Example of a Log House which may secure planning consent within the open countryside setting

These are photographs of a Latvian log house which has been imported and built at Eastfield farm. This is two log houses. They were made in Latvia and shipped to Britain on lorries and reassembled in a week. The land for sale is zoned in the local plan as open countryside and as such would likely secure planning consent for a managers house which could be occupied on a full time basis but normally you would need to apply for three other log houses as well or maybe two log houses and some pods. It has to be a business and the planners would normally put a condition on the auxiliary house that they can't be occupied by one family for more than 4 months in the year.

Services

There is mains water and electricity. A private sewage treatment plant needs built. McGregor McMahon Consulting Engineers have done porosity tests and designed a plant.

Plans

Details of three house designs and room sizes can be given on request.

Contamination

A contamination survey has been carried out by McGregor McMahon Consulting Engineers following oil leakage from a garage. The cost of treating this is being investigated.
