Fenced yard area with big double gates

1.32 acres of land

There is a vehicular right of access down the farm track to the house gates and to the gate at the end of the field. The bottom gate over the bridge is not access into the bottom field.

Both lots have a burn running through the fields and the burn could be dammed to create lochs. The fields would be ideal for having pods or log houses for renting out. This would require planning consent.

The main outlook is to the east where there is presently a large door. A large conservatory could be added without planning permission as it would be permitted development. This would give a southerly outlook. I think that the planners would allow a 20% increase in the footprint over and above the existing footprint. There is an extension on the south (69.79sqm), you could go back and make a variation of the existing planning consent by converting this extension plus try to secure an overall 20% increase but the seller would prefer to secure an immediate sale rather than subject to planning consent.

Lot 1 is still on the open market at a fixed price of £185,000. Lot 2 sold for £130,000 (the proposed house size is tiny compared to Lot 2). Some of the land could be sold off separately for £15,000/acre.

Ground Floor = 13.2m x 9.64m = 127.25m²

First Floor = 13.2m x 6.625m = 87.45m²

1.85m x 1.3m x 3 = 7.22m²

First Floor = 94.67m²

221.92m²

Extension to South = 69.29m²

Total = 291.21m²

Total + 20% = 349.45m²

GF + Extension to South + 20% = 235.85m² + FF (94.67m²) = 330.52m²

On the next page is a recent government policy document on the government trying to encourage development of brownfield sites. Because the original consent dates back to 2007, it could be argued that a newbuild house would be more economically viable with good foundations as opposed to a conversion where a kit house would be lowered into the existing shell.

Re-use vacant and derelict land and empty buildings

There is a clear case for acting now to prioritise the use of vacant and derelict land and properties. This has the potential to deliver significant benefits including sustainable, inclusive growth and reduced emissions as an integral part of our future sustainable and circular economy.

Scotland has too much vacant and derelict land – this is rightly regarded as unacceptable and an issue of national concern that needs to be urgently addressed. The consequences come at too high a price, directly impacting on health and blighting economic, social and environmental recovery. Vacant and derelict land introduces a level of redundancy that our society can ill afford. Whether it is large scale long-term dereliction, or small scale short-term vacancy, we need to set out a stronger policy framework that will give confidence to communities and public and private

sectors that vacant and derelict land represents an opportunity to stimulate a positive future whilst building on the legacy of the past.

Our national planning policies can complement wider work on vacant and derelict land. The Vacant and Derelict Land Taskforce has identified longstanding vacant and derelict sites which the planning system could play a role in bringing back into use and this is a key priority highlighted by the Scottish Land Commission which proposes this as a national priority for NPF to address, and the Vacant and Derelict Land Fund seeks to provide funding solutions to the issues.

We must change the perception of vacant and derelict land from being a liability to becoming an asset. We could do much to inspire innovation and imagination in considering how we can achieve this. The strategy can set out spatial priorities and opportunities that help to guide future investment.

The relationship between town centres and suburbs and the role of the green belt will also benefit from a long term spatial perspective that reflects our net-zero and environmental ambitions. We will develop a vision for the future use of vacant and derelict land so that regional strategies and local development plans can work collectively to unlock the potential of land within our existing settlements to provide multiple benefits. Supporting this, stronger policies to limit greenfield development and recognise the potential for green belts to form a part of multifunctional green networks could help to achieve positive effects for biodiversity whilst also helping to realise the health and climate benefits of growth within existing urban areas.

We can strengthen our approach to vacant and derelict land, given the development challenges and potential benefits for climate change and quality of life. Ideas include use of this land for renewable energy, green infrastructure/naturalisation, community growing or city farms, employment and investment and housing. There is support for stronger prioritisation of brownfield development over the release of greenfield land. Development viability and the use of delivery mechanisms to unlock brownfield land and redevelop buildings at risk are also key considerations.

We have received email confirmation from Falkirk Council which states the following:

“I can confirm that planning permission was granted on 07 March 2007 under planning application 06/0099/FUL for the Alterations, Extension and Conversion of Farm Outbuildings to Form 4 Dwellinghouses at Linhouse Farm. This consent was implemented and therefore remains live in perpetuity.”

TOWN AND COUNTRY PLANNING (SCOTLAND) ACTS AS AMENDED

Detailed Planning Permission

Applicant:

Mr James Conroy

Agent:

Angus Design Associates
The Building Design Centre
125 Muir Street
Hamilton
ML3 6BJ

In respect of the application registered on 6 December 2006 for the proposals described below,

Development Alterations, Extensions and Conversion of Farm Outbuildings to Form 4 Dwellinghouses
Location Linhouse Farm, Falkirk, FK1 2JS,

and in accordance with the powers conferred upon me by the Town and Country Planning (Scotland) Act 1997, I hereby grant the above permission, in exercise of its powers under the above legislation, hereby

Grants Detailed Planning Permission

This decision is issued subject to the following condition(s):-

1. The development to which this permission relates must be begun within five years of the date of this permission.
2. Prior to the commencement of work on site, full details of the proposed boundary treatments shall be submitted to and approved in writing by the Local Planning Authority.
3. Prior to the commencement of work on site, full details of the proposed surface water drainage system shall be submitted to and approved in writing by the Local Planning Authority.
4. Development shall not begin until a scheme to deal with contamination on the site has been submitted to and approved in writing by the Planning Authority. The scheme shall contain details of proposals to deal with contamination to include:
 - i. the nature, extent and types(s) of contamination on the site.
 - ii. measures to treat/remove contamination to ensure the site is fit for the use proposed.
 - iii. measures to deal with contamination during construction works.
 - iv. condition of the site on completion of decontamination measures.

Before any unit is occupied the measures to decontaminate the shall be fully implemented as approved by the planning authority. In addition, in appropriate circumstances, a condition covering monitoring measures may be included.

5. The driveways shall be constructed so that their gradients do not exceed 1 in 10 and so that no surface water is discharged or loose material is carried out onto the public road.

6. There should be no obstruction to visibility over 1m in height above the carriageway level within 2.5m of the road channel over the full frontage of the site with the public road.
7. At the proposed access to the site from the main road; there shall be no building, structure, tree, shrub or other obstruction to visibility above carriageway level within a visibility splay of 2.5m by 90m in both directions.

Reason(s):

1. To accord with the provisions of Section 56 of the Town and Country Planning (Scotland) Act 1997.
2. To safeguard the visual amenity of the area.
3. To ensure that adequate drainage is provided.
4. To ensure the ground is suitable for the proposed development.
- 5-7. To safeguard the interests of the users of the highway.
